7. Examiner's Amendment/Comment
8. Examiner's Statement of Reasons for Allowance
9. Other See Continuation Sheet below.

DETAILED ACTION

Response to Amendment

1. Claim rejections under obviousness-type double patenting, on claims 1-7 are withdrawn since timely filed a Terminal Disclaimer is received on 3/21/05 and approved on 5/21/05 accordingly.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jeffrey M. Glabicki on August 10, 2005.

The application has been amended as follows:

- In the drawing, **FIG. 1, 2, and 3** have been designated by a legend --**Prior Art - -**
(see attached)
- Claim 1, line 5, “**a primary synchronization signal**” has been replaced with -- **the primary synchronization signal - -**
- Claim 5, line 6, “**a primary synchronization signal**” has been replaced with -- **the primary synchronization signal - -**

Allowable Subject Matter

3. Claims 1-7 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Claims 1-7 are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose the following italic limitations:

In claims 1 and 5, ...*a set of secondary synchronization signals which does not exceed $(\log_2 N) + 1$ number...* in combination with other limitations recited as specified in Claims 1 and 5.

Note that the closest prior art SRIAM (US006665277B1) discloses a base station capable of communicating in a time division duplex using code division multiple access format (see col. 1, line 60 to col. 2, line 5; see col. 4, line 65-66), the base station transmitting a primary synchronization signal (see FIG. 5, FSC) and secondary synchronization signals (see FIG. 5, SSC) for synchronization purposes, the base station comprising:

means for transmitting the primary synchronization signal in a selected time slot (see FIG. 5, Slot 1,2,.., or 16) in a primary synchronization channel (see FIG. 5, Primary channel), the primary synchronization channel using a plurality of time slots for communication (see FIG. 5, slots 1-16; see col. 4, line 30-66);

means for associating each of a plurality of combinations of N code groups and the plurality of time slots with a unique combination of secondary synchronization signals from a set of secondary synchronization signals (see col. 4, line 50 to col. 5, line 6), and

means for transmitting selected secondary synchronization signals, the selected secondary synchronization signals associated with one of the N code groups, the one group associated with the base station (see col.5, line 6-35).

However, Sriam fails to disclose above italic limitations. Thus, Sriam fails to disclose or render obvious the above limitations as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
